

PROJECT NAME:

**Integrated Facility Management Services for
A*Star Fusionopolis**

Project Location:

Network Link, One-North

Name of Client:

Agency for Science, Technology and
Research (A*Star)

Background :

Architect: Kisho Kurokawa Architects &
Associates

The first phase, Fusionopolis Phase 1, is comprised of two towers – one with 24 floors and the other, 22 floors with a podium. This development has 6 basements and yields on a total of 120,000 sqm of floor space. This first integrated work-live-play-learn development aims to foster synergistic collaborations between the public and private research institutes and energise the vibrant infocomm and media industry.

Fusionopolis Phase 2, will include a 16-storey mixed office and retail buildings and will also have wet and dry laboratories, as well as Singapore's largest clean-room facility, when its completed next year.

This multi-tenanted facility is dedicated to house infocomms, media, science and engineering research and development companies has already attracted players in the industry such as I2R, IHPC and DSI. Its 56,000 sqm of business park space shall be designed for provision to be converted into dry and wet laboratories to meet the pipeline demand.

GFA: 120,730 sqm.
